Personal Portfolio Website

The purpose of my website is to showcase my skills and experiences that have shaped me into becoming a better programmer. The code for my website can be found here: [Code](). I started building the website in November 2022 using a combination of CSS, JS, PHP, and HTML. I was inspired by [Aiden Chang](), senior running back and computer science major at Carleton, who went live with his portfolio a month before I started building mine. I am a passionate individual who enjoys coding and wants to use technology to dramatically impact the world. My favorite programming language is Python and I am an avid video game fan. I have loved learning about front-end development throughout this project and look forward to seeing where my career takes me in the future. If you would like to connect with me, please email me at [benzhao90@gmail.com]().
